INTRODUCTION

This publication is the 69th production of Vital Statistics Data of the State of Georgia. The 1988 data set is divided into two volumes, Natality and Mortality. Their purpose is to serve as a reference source to provide useful information to public and private individuals, institutions, and agencies involved with Health Services, especially the analysis, planning and evaluation of public health services for Georgia citizens.

The tables in this volume reflect annual frequencies and rates of vital events for the state's residents (except as noted) by state, health district, metropolitan statistical area, and county.

The Office of Planning and Budget's civilian, noninstituational population projections used in this volume, were adjusted by adding a resident military component. The projections are included to allow the reader to compute rates not represented in this volume. The reader must note, however, that there have been substantial changes in some county populations. In 1986, OPB re-calculated population estimates through 1990. The rates shown in this volume, therefore, may vary slightly from previous publications or other projections due to these changes. Also, there have been substantial population shifts in some counties in Georgia, however, we feel the rates shown in this volume are consistent with previous years rates.

Other vital statistics data not presented is available upon request but may require a fee to produce. Send all statistical requests to:

We trust the information provided in this volume will prove helpful. Comments or suggestions regarding this publication are welcome.

This report includes 1988 Georgia resident data taken from certificates or reports of birth, marriage, divorce, spontaneous abortion or stillbirth, and induced abortion which were received in the State Vital Records office by June 30, 1989. The figures and rates reflect data from vital events occurring to the total figures shown. Any difference between the total and race totals is accounted for by "other" races; however, all races are included in the total category.

The assignment of infant mortality frequencies and rates is determined by the mother's indicated residence as shown on the matching Certificate of Live Birth. Infant deaths occurring to resident military personnel are included.

The coded residence of infant deaths is adjusted in the following manner:

BIRTH CERTIFICATE	DEATH CERTIFICATE	RESIDENCE ADJUSTMENT CODE
Georgia Resident	**Georgia Resident**	**Mother's Georgia Residence on birth certificate**
Georgia Resident	**Not Georgia Resident**	**Mother's Georgia Residence on birth certificate**
Not Georgia	**Georgia as state of death occurrence but not residence.**	**Residence as shown on death certificate. If not Georgia residence, these deaths are not included in the annual total of resident infant deaths.**

INTRODUCTION

This publication is the 69th production of Vital Statistics Data of the State of Georgia. The 1988 data set is divided into two volumes, Natality and Mortality. Their purpose is to serve as a reference source to provide useful information to public and private individuals, institutions, and agencies involved with Health Services; especially the analysis, planning and evaluation of public health services for Georgia citizens.

The tables in this volume reflect annual frequencies and rates of vital events for the state's residents (except as noted) by state, health district, metropolitan statistical area, and county.

The Office of Planning and Budget's civilian, noninstituational population projections used in this volume, were adjusted by adding a resident military component. The projections are included to allow the reader to compute rates not represented in this volume. The reader must note, however, that there have been substantial changes in some county populations. In 1986, OPB re-calculated population estimates through 1990. The rates shown in this volume, therefore, may vary slightly from previous publications or other projections due to these changes. Also, there have been substantial population shifts in some counties in Georgia, however, we feel the rates shown in this volume are consistent with previous years rates.

Other vital statistics data not presented is available upon request but may require a fee to produce. Send all statistical requests to:

We trust the information provided in this volume will prove helpful. Comments or suggestions regarding this publication are welcome.

This report includes 1988 Georgia resident data taken from death certificates received in the State Vital Records office by June 30, 1989. The figures and rates reflect data from vital events occurring to the total deaths shown. Any difference between the total and race totals is accounted for by "other" races; however, all races are included in the total category.

The assignment of infant mortality frequencies and rates is determined by the mother's indicated residence as shown on the matching Certificate of Live Birth. Infant deaths occurring to resident military personnel are included.

The coded residence of infant deaths is adjusted in the following manner:

BIRTH CERTIFICATE	DEATH CERTIFICATE	RESIDENCE ADJUSTMENT CODE
Georgia Resident	**Georgia Resident**	**Mother's Georgia Residence on birth certificate**
Georgia Resident	**Not Georgia Resident**	**Mother's Georgia Residence on birth certificate**
Not Georgia	**Georgia as state of death occurrence but not residence.**	**Residence as shown on death certificate. If not Georgia residence, these deaths are not included in the annual total of resident infant deaths.**

AN ACT

CREATING A

Department of Health

AND THE

Rules and Regulations

Adopted and Issued

BY THE

GEORGIA STATE BOARD OF HEALTH

"If a man, conscious that he carries about with him the germs of a contagious disease, recklessly exposes the life and health of others, he is a public nuisance and criminal, and may be held answerable for the results of his conduct. If death occurs through his recklessness, he may be indicted for manslaughter. It is held that where a man knowingly communicates a contagious disease to another and death results, the crime is that of manslaughter. The man may be indicted also for spreading the disease by conscious exposure of others thereto, by his presence in public places, such as on the streets, in halls etc."—*Judge Dixon, of New Jersey.*

SEVERAL CHANGES HAVE OCCURRED TO THE 1988 MORTALITY AND BIRTHS VOLUMES MAILED TO YOU RECENTLY. THE REPLACEMENT PAGES ARE ATTACHED FOR YOUR CONVENIENCE.

PAGE 200 IN THE BIRTHS VOLUME WAS TURNED DOWN AT ONE EDGE DURING PRINTING. THE REPLACEMENT PAGE FOR PAGE 200 IS ATTACHED.

FROM THE ~~BIRTHS~~ Mortality VOLUME, THE CHART OF "OTHER FORMS OF HEART DISEASE" SHOWING THE TREND FROM 1977-1988 HAS BEEN UPDATED (P. 675, FIG. 27).
